

I listen to XM Radio in my car driving to and from work every day. I find the quality and wide variety available invaluable; I have never heard its like on broadcast radio. I also find the traffic and weather channel in my area (I commute south toward Boston) very important to my commute. I don't believe that the National Association of Broadcasters should stifle what I can hear. If local radio stations want my business back, they should act competitively, not try to use government to stifle the other side. I respectfully urge the FCC to reject the NAB's petition 04-160. Thank you.
